

## **Sno Cone Machine Operating Instructions**

Preparation: Install the machine in a level position. (Be aware that water will drip from the case, so don't use your best table.) Connect the cord to a standard 110 outlet. Place the motor on top of the plexiglass case.

1. Start the motor and fill the gooseneck with ice cubes.
2. Push the plunger handle to press the ice against the grinder. **DO NOT FORCE THE HANDLE OR THE MOTOR COULD STALL.**
3. If the motor stalls, unplug the unit, allow the ice to melt, and then restart the motor.
4. Keep foreign objects out of the head.
5. Scoop ice into cups and add syrup. We estimate you'll get 3 servings per 1 pound of ice.
6. **DO NOT STICK YOUR HAND OR ANY OBJECT DOWN THE GOOSENECK OF THE MACHINE. DO NOT ALLOW CHILDREN TO OPERATE THE MACHINE. DO NOT LEAVE THE MACHINE UNATTENDED.**
